Subject: Regarding RIN 1210-AB33

To whom it may concern,

The worst thing the government could do to me is to socialize my private retirement funds.

Those retirement funds are mine, because I earned them in spite of the government taxes on my income.

It is NOT fair or right for the government to take away my money.

This is the ultimate wealth tax. It is communism.

If the government does this, there will be political revenge against the entire political establishment.

Regards,

Robert Payne
